

과정:

The screenshot shows a database console window with the following SQL commands:

```
create table mission(  
  id bigint,  
  store_id bigint,  
  reward int,  
  deadline datetime,  
  mission_spec text,  
  created_at datetime(6),  
  updated_at datetime(6),  
  primary key (id),  
  foreign key (store_id) references store(id)  
);  
  
create table member_mission(  
  id bigint,  
  member_id bigint,  
  mission_id bigint,  
  status varchar(16),  
  created_at datetime(6),  
  updated_at datetime(6),  
  primary key (id),  
  foreign key (member_id) references member(id),  
  foreign key (mission_id) references mission(id)  
);
```
